

THOMAS BURTON-LAWL

Full Stack Developer

PROFILE

I am a friendly and enthusiastic person with a keen interest in understanding how things work. I love to learn new skills and draw upon the unique knowledge of those around me. I always aim to further develop my programming skills, knowledge and understanding of the full stack, and would like to immerse myself in a supportive environment where I can build great things with great people.

Outside of work, I love to learn about cosmology and physics, spend rainy days fly fishing for trout, and spend my evenings playing indie games, making chainmail, or playing D&D.

WORK EXPERIENCE

June 2024 - June 2025

Software Engineer | Source Insurance Ltd

Building and maintaining an insurance platform as part of the dev team. This platform utilized a microservices architecture based on Node and express, and used bootstrap as a front end framework.

September 2023 – May 2024

Software Developer | Empyrean Digital Ltd

Collaborating with the development team on responsive and accessible website and application builds to pixel perfect specifications. I was also part of the Henley Royal Regatta streaming team for two years in a row.

March 2022 – September 2023

Junior software developer | Empyrean Digital Ltd

Took on multiple roles, leading various aspects of development and managing 8 support desks. Acted as the first point of contact for client issues, handling ticket triaging, bug fixes, technical support, and security updates. Collaborated with senior developers for complex issue resolution. I was responsible for planning and implementing the requirements for company Cyber Essentials Plus certification.

Jan 2020 – March 2022

Web developer | Freelance

Worked with clients and UX designers to implement responsive web designs to exact specifications.

Oct 2020 – March 2022

Support coordinator | Keyring

Manage and train staff, design processes and recording tools. Lead team meetings, supervise staff, and represent the service at various levels.

EDUCATION

August 2022

Azure fundamentals | Microsoft Certification

Jan 2020

Complete web developer bootcamp | UDEMY.com

This course covered HTML, CSS, JavaScript (ES6), NodeJS, ExpressJS, MongoDB, Mongoose, Authorization, DOM manipulation, responsive design, and many other technologies.

September 2011- 2014

BA Music | Falmouth University
